Art Unit: 3653

1. Applicant's election with traverse of Group I, claims 1-9 and 16-19 in the reply filed on 1 March 2005 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner in examining all the related inventions. This is not found persuasive because the search for the method of Group II is not necessarily co-extensive with the elected invention, nor is the search for the subcombination of the computer readable media of Group III. Since the searches for the non-elected inventions are not co-extensive there is an additional burden on the examiner to consider these additional inventions.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 through 9 and 16 through 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 lines 6-8, it is how the sensing actuator unit performs the recited function as the structure and/or the structural relationship with the various other elements to permit this function has not been clearly defined.

In claim 1 lines 9-12, it is not clearly understood what the control unit is controlling in order to accomplish the stated functions.

In claim 16 lines 6-8, it is not clearly understood what the control unit is controlling in order to accomplish the stated functions.

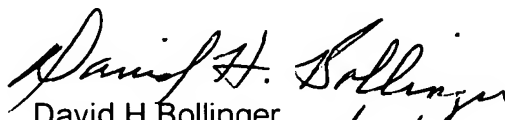

Art Unit: 3653

4. Claims 1 through 9 and 16 through 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
